

YOUR *Kitchen*

Today more than ever, the kitchen is the centre of activity and entertainment for the family home. No longer a closed environment or simply a workspace, designs reflect our lifestyle and the personality of the family, so aim to ensure that design choices flow from the kitchen area into adjacent living and dining areas.

In the kitchen, every surface needs to be durable and easy to maintain, particularly for benchtops and cabinet doors.

Minimalist lines, wide surfaces and contrasting materials are still relevant to today's living but are becoming softened by colour choices and functional living spaces.

Your Homestead Homes selection consultant can help you create a complete kitchen package. From stone or laminate benchtops through to cupboards and splashbacks, you'll find a design solution to reflect your individual needs.

With market leading brands such as Formica[®], Laminex[®] and essa stone[™], you are sure to find the inspiration you need for your new home.

The kitchen is the centre of
activity and entertainment.
